

Professional Summary

Computer Science and Engineering student passionate about Software Development, Machine Learning, Computer Vision, and Full-Stack Web Development. Experienced in building responsive web applications and developing intelligent solutions using modern technologies. Strong problem-solving mindset with a commitment to continuous learning and innovation.

Education

B.Tech in Computer Science and Engineering 2023 – 2027 VVIT, Guntur CGPA: 8.4

Technical Skills

Programming Languages: Java, JavaScript, HTML5, CSS3
Web Technologies: Node.js, Express.js, REST APIs, Responsive Web Design
Databases: MongoDB, MySQL
Machine Learning: Machine Learning, Computer Vision, YOLOv8, Deep Learning, Object Detection
Libraries Tools: NumPy, Pandas, Git, GitHub, VS Code, Google Colab, Vercel, Render
Core Computer Science: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering

Projects

MouthTalk – Movie Discussion Platform

GitHub Repository

- Developed a full-stack movie discussion platform using Node.js, Express.js, MongoDB, HTML, CSS, and JavaScript.
- Designed RESTful APIs for user interactions and content management.
- Implemented responsive web design for seamless cross-device experience.
- Deployed the application using modern cloud hosting platforms.

NOGUNTA – Smart Pothole Detection and Reporting System

GitHub Repository

- Developed a pothole detection system using YOLOv8, Computer Vision, and Deep Learning techniques.
- Trained and evaluated object detection models on a custom annotated dataset.
- Implemented real-time pothole detection on road images and video streams.
- Applied image preprocessing, model validation, and performance evaluation methods.

Certifications

- AWS Academy Cloud Foundations
- LinkedIn Learning – SEO Foundations
- LinkedIn Learning – Illustrator for UX Design

Areas of Interest

Machine Learning Computer Vision Software Development Full-Stack Development
